

SPILLARD
SMART RETRACTABLE ACCESS

SafeStep 

SMART RETRACTABLE ACCESS

- Simple.
- Safe.
- Superior.

Hydraulic access systems to assist in the safe access or egress of your earthmoving equipment.

Designed to safely retract when the operator either turns the key off, lowers the safety lever/ applies the park brake or the machine loses power.

Due to the electronic control system the machine cannot operate until the steps are in the fully closed position, with audible and visual warnings to alert both operator and surrounding workers.

SafeStep

Custom designed and innovative

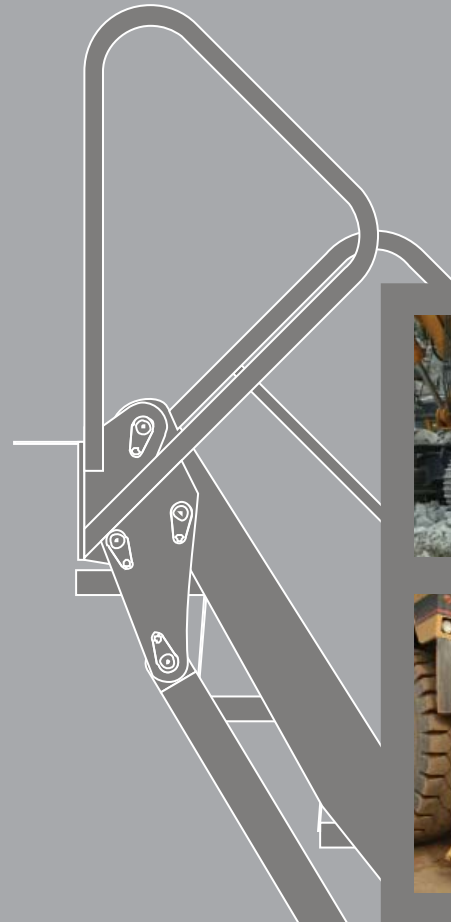

- retractable access, upper guardrails and walkways -
